The Director of Central Intelligence

Washington, D.C. 20505

National Intelligence Council

17 January 1984

NOTE FOR THE DIRECTOR

SUBJECT: Meeting with Dr. William G. Howard, Jr., Vice President and Corporate Director for Research and Development for Motorola

You and I agreed during an earlier meeting that I would invite vice presidents of R&D from certain key industrial companies to visit CIA to talk with you and others about their views of future technologies. The first such meeting will be held on Wednesday, 18 January, at 1330 in your office.

Our visitor will be Dr. William Howard, Vice President and Corporate Director for R&D for Motorola, and I believe he is in a good position to give us a good understanding about the future of semiconductor and communications technologies. I believe discussions with Dr. Howard will complement well those which we had last week at IBM. I have invited Evan Hineman and [redacted] to join us.

As a reminder, you have invited Dr. Howard to participate in the Semiconductor Industry Conference which OGI is sponsoring on 29-30 March at Airlie House.
